PROJECTS

PASSENGERCONNECT | Android/IOS app in *ReactNative, Express & MongoDB*

June 2020 | Univeristy project; 5th year; Project Management Laboratory

Mobile application which provides a communication channel between transport operators and its users in real-time. Worked mainly but not only on frontend for IOS compatibility.

WINERD PLATFORM | website in *React, Express & PostgreSQL*

January 2020 | Univeristy project; 4th year; Information Systems

Costumizable interface to handle transactions between two companies who buy/rent services to each other. Use of Jasmin REST API in order to perform and access the sales/sotck company operations.

BRISK | site in *Larvel & PostgreSQL*

June 2019 | Univeristy project; 3rd year; Database and Web Applications Laboratory

Project proposed by a company. Metric and project management tool with a simple interface.
Team leader (team of 6 people); responsible for DevOps.
